

Add a touch screen VIDEO MONITOR

to your next display

Play video by simply touching a dynamic screen icon corresponding to the video.

Highly interactive, multi-layer touching screen.

The player will stop playing and go back to the upper level of menu once any area is touched by a viewer during playing.

A video will start playing when its corresponding static icon is touched.

When the video playing is completed, the player will go back to normal loop playing.

MAIN FUNCTIONS

1. **Play MP4 movie, MP3 music and digital photos;** Built-in TFT LCD screen, with tempered glass protection; easy-to-install on supermarket shelves, tabletop, showcase, car and taxi, etc
2. Play from:
 - Compact Flash card (CF card)
 - USB flash drive
3. **Auto upgrade contents of the internal memory card.** Simply insert an USB flash drive with new content, no need to take out of the memory card.
4. **IR (infrared) body sensor:** the sound of the player starts automatically when the sensor detects an approaching viewer; This function can be disabled or enabled.
5. **No DVD style mechanical movement,** hence more durable and suitable for long-hour advertising playing.
6. **7 function keys** on the players, they can be turned on/off.
7. **Timer function:** the player powers on / off automatically everyday at the time pre-set; It can also automatically play and non-stop replay within the pre-set time frame.
8. **Theft-protection device** effectively prevent the player and CF card from being stolen in public place.
9. Audio output: 2 X built-in **high quality stereo speakers.**
10. Use standalone or with a display designed to your specifications.

Upgrade contents of the memory card by simply inserting a USB flash drive

Timer function: the player turns on/off at the same time everyday according to your setting

The player starts automatically when the IR (infrared) body sensor detects an approaching viewer.

Our displays now feature high quality, solid state

VIDEO MONITORS

as seen in Bed Bath & Beyond, Sears and BJ's
